

Field: Environment
Name: Valley Irrigation Pakistan (Private) Limited
Location: Lahore, Pakistan
Names of Positions: Engineering and Design Intern
Sales and Marketing Intern

Brief Description of Organization:

Valley Irrigation Pakistan represents U.S. based Valmont Industries, Inc. irrigation division's "Valley" brand of center pivot and linear move sprinkler irrigation systems. Valmont's "Valley" irrigation technology helps the region preserve food supply, conserve water, and make life easier and more profitable for those who grow food. More than fifty years of engineering, testing, and grower feedback allow the company to continue to innovate.

Information specific to the internship:

Primary Responsibilities

Engineering and Design

1. Use knowledge of GPS technology, mechanical/civil/hydrological engineering, and CAD software to design high efficiency mechanical move sprinkler irrigation solutions to fit field GPS surveys.

Sales and Marketing

1. Qualify prospective farmers (clients) on certain technical and financial criterion
2. Follow up with post-qualification client and GPS survey of farm site where MMI equipment is required
3. Prepare quotations with additional options and details of finalized design
4. Lobby Agriculture Department and Water Management government officials

Schedule:

Desired start date is flexible based on student schedule.

Stipend / Assistance:

- a) Room & board (3 meals)
- b) Language training
- c) Company cell phone and vehicle
