

Field: Education, Business

Name: Institute of Business Administration (IBA), Karachi

Location: Karachi, Pakistan

Name of Positions: Summer Project Intern

Brief Description of Organization:

IBA is the oldest business school outside North America. It was established in 1955 with initial technical support provided by the world famous Wharton School of Finance, University of Pennsylvania; later, the University of Southern California set up various facilities at the Institute and several prominent American professors were assigned to the IBA. The course contents, the curriculum, the pedagogical tools and the assessment and testing methods were developed under the guidance of reputed scholars from these two institutions. IBA has jealously guarded the high standards and academic traditions it had inherited from Wharton and USC while adapting and adjusting them with the passage of time. A large number of Pakistani faculty members received advanced degrees from Wharton and the University of Southern California. Despite a rapid increase in the number of business schools, the IBA has maintained its position as the premier institution of higher learning in the field of management and business administration. The recurrent theme of the 50 years of IBA's existence is that business education should be rigorous but also relevant and looking to the future. The IBA provides an enabling environment, conducive to scholarship and research. Faculty, staff, students, and members of the industry work together to achieve learning goals. The IBA programs are designed to provide world-class professional managers and entrepreneurs for the business and industry in Pakistan.
